

THE FAKE AND DECEPTIVE SCIENCE BEHIND ROE V. WADE

Settled Law? vs. Settled Science?

Book Description

Our schools and healthcare institutions have abandoned the Hippocratic Oath and the Declaration of Geneva and replaced it with a policy of lethality. This is a direct result of the Supreme Court's acceptance and promotion of archaic scientific reasoning (Roe v. Wade) that, at best, would be considered pre-medieval and clearly out of touch with scientific reality. Fallout includes the expansion into fetal experimentation, human cloning, embryonic stem cell research, infanticide, and even physician-assisted suicide programs. Dr. Hilgers argues that as we move to reestablish the human right to live, we must also move beyond lethality and install positive, life-affirming and meaningful solutions to real human problems.

★★★★★

Praise

"There is so much to the history of Roe v. Wade, particularly the science used in the writing of the opinion, that isn't discussed. I learned so much from this book! I couldn't put it down. It's easy to read, too!"

— TERESA N. (from Amazon.com)

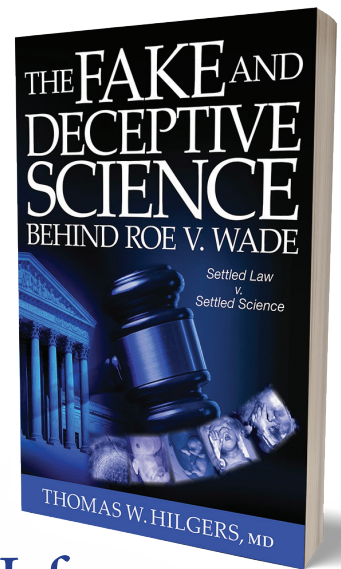

"'Follow the science' is the ultimate ironic calling card for those seeking legitimacy to widespread intentional abortion. Dr. Hilgers masterfully unmask and debunks this Orwellian mantra of the modern age in The Fake and Deceptive Science Behind Roe v. Wade!"

— CHUCK WEBER, Kansas Catholic Conference

Thomas W. Hilgers, MD

Dr. Hilgers is the Founder and Director of the Saint Paul VI Institute for the Study of Human Reproduction in Omaha, Nebraska. He's also the Medical Director of its nationally accredited reproductive ultrasound center that features 3-D and 4-D ultrasound imaging. Working at St. Louis University and Creighton University Schools of Medicine, he and his co-workers developed the CREIGHTON MODEL FertilityCare™ System and the new women's health science of NaProTECHNOLOGY®.

Dr. Hilgers is currently a Senior Medical Consultant in Obstetrics, Gynecology, Reproductive Medicine and Surgery at the Saint Paul VI Institute and a Clinical Professor in the Department of Obstetrics & Gynecology at Creighton University School of Medicine. He is board certified in obstetrics, and gynecology, gynecologic laser surgery. He is a member of the Society of Reproductive Surgeons and the Society of Procreative Surgeons. He is the recipient of three honorary doctorates and was named the Physician of the Year by the Nebraska Family Council.

Interview Questions for Dr. Hilgers

- *Science in our day tends to treat pregnancy as a disease. Why is that?*
- *Most people who've studied Roe v. Wade know that it's bad law, but explain why it's also bad science.*
- *Some political observers are afraid that President Trump's pick for the U.S. Supreme Court will lead to the end of Roe. If that happens, abortion reverts to individual states. What's next for the pro-life movement after that?*
- *You write that the Supreme Court has embraced the "lethality becomes a way of life" ethic. Do you see that changing?*
